

The KFACA needs you!

Fishing closures are coming to California waters, and kayak anglers stand to feel the most pain. A state law, the Marine Life Protection Act (MLPA), requires formation of a statewide network of reserves. Just a few reserves placed in the wrong areas could sweep us from the water.

We can't stop the MLPA process, but with your support we can fight to keep the closures away from our kayak fishing launch sites! It is up to us, kayak anglers, to look out for our own interests.

The Kayak Fishing Association of California (KFACA) is a volunteer, nonprofit grassroots advocacy group dedicated to preserving and expanding kayak fishing opportunities. The KFACA is open to anyone in the kayak fishing community.

Learn more about the MLPA and other issues at the Kayak Fishing Association of California website:
